## 30XA/XQ

### Air-Cooled liquid Chiller Reversible Air-To-Water Heat Pump

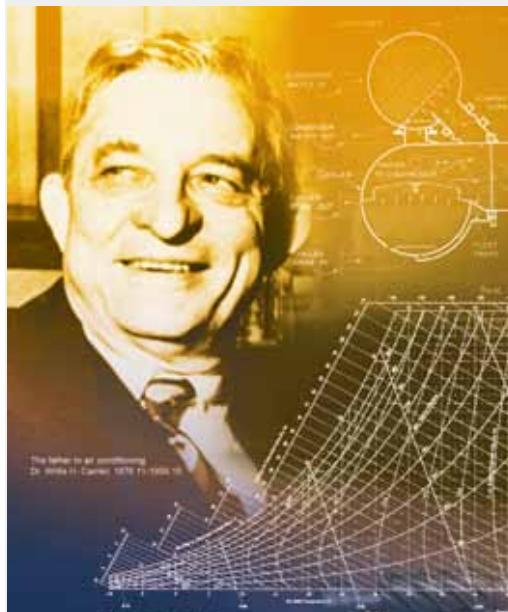

30XA: Nominal cooling capacity: 274-1518kW

30XQ: Nominal cooling capacity: 315-1471kW

Nominal heating capacity: 311-1412kW

## Carrier China

In 1998, Time magazine named Dr. Carrier one of its 20 most influential builders and titans of the 20<sup>th</sup> century.

Carrier Corporation is a subsidiary of the United Technologies Corp. (UTC), which ranks the 150th in Fortune Top 500 in 2011 and has its operations in aerospace and building systems industries all over the world. From the time the founder Dr. Carrier invented the first system of modern air conditioning in 1902, Carrier has been the world leader in the air conditioning industry with its products and system solutions supplied to numerous famous buildings, and up to now, the network of distribution cover more than 170 countries all over the world. In 2011, Carrier ranked top in the HVAC industry field with its sales revenue of US \$12 billion.

In China, there are 6 Carrier factories which have more than 2500 employees. As the world-class factory, Carrier has a number of technically advanced production lines, manufacturing commercial and residential chillers, compressors and air-side products. A wide range of products are able to meet diversified requirements of different customers. The global R&D center located in Shanghai has the capability of developing several major projects in the same time, with many advanced technical patents awarded to support Carrier stay most competitive in terms of technology advantage in the HVAC industry.

## Features

- The Aquaforce liquid chillers are the premium solution for industrial and commercial applications where installers, consultants and building owners require optimal performances and maximum quality.

## Benefits

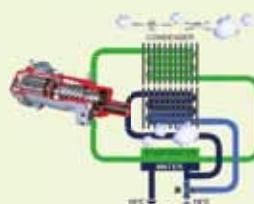

- Extremely high full load and part load energy efficiency leads to extremely low operation cost.
- Low operating sound with no intrusive low-frequency noise, creates a better working/living environment.
- Environmentally sound refrigerant HFC-134a of zero ozone depletion potential.
- Easy and fast installation to reduce on-site installation time.
- Exceptional endurance tests ensure superior reliability to minimize chiller down-time.

## Economical operation

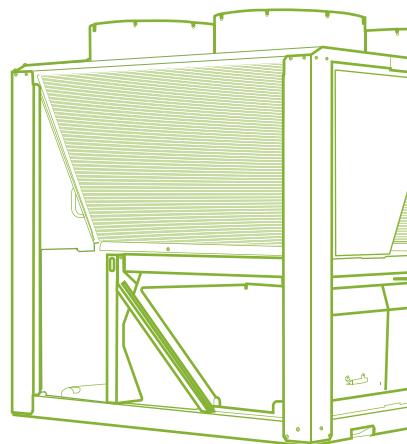

- Extremely high full load and part load energy efficiency:
  - New twin-rotor screw compressor equipped with a high efficiency motor and a variable capacity valve that permits exact matching of the cooling capacity to the load.
  - Flooded multi-pipe evaporator to increase the heat exchange efficiency, configured with aluminium cladding (standard) to improve thermal insulation and prevent energy loss.
  - Electronic expansion device allows operation at a lower condensing pressure and improved utilization of the evaporator heat exchange surface (superheat control).
  - Economizer system with electronic expansion device permits a considerable increase in cooling capacity and contributes to optimised energy efficiency of the chiller installation.
  - DX free cooling system developed for building that require year-round cooling and in the coldest regions increase energy efficiency and significant energy savings (EER~15 to 30).
  - Average COP of 3.2 at nominal conditions and average integrated part load value (IPLV) of 4.4.

Economizer system

DX free cooling system

## Quiet operation

- Compressors
  - Discharge dampers integrated in the oil separator (Carrier patent).
  - Acoustic compressor and oil separator enclosures (option) reduce theradiated noise.
- Condenser section
  - Condenser coils in V-shape with an open angle, allows quieter air flow across the coil.
  - Low-noise Flying Bird fans (Carrier patent) enjoy quieter operation andnever generate intrusive low-frequency noise.
  - Rigid fan mounting preventing start-up noise (Carrier patent).

New twin screw CARRIER compressor

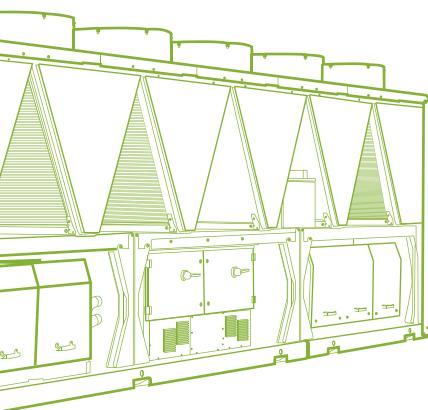

Flying Bird IV axial flow low noise fan

- leaf HFC-134a refrigerant
  - Refrigerant of the HFC group with zero ozone depletion potential.
- leaf Leak-tight refrigerant circuit
  - Reduction of leaks as no capillary tubes and flare connections are used.
  - Verification of pressure transducers and temperature sensors without transferring refrigerant charge.

## Easy and fast installation

- leaf Integrated hydronic module (option)
  - Single or dual pump (as required) with operating time balancing and automatic changeover to the back-up pump if a fault develops.
  - Water filter protecting the water pump against circulating debris.
  - High-capacity membrane expansion tank ensures pressurization of the water circuit.
  - Thermal insulation.
  - Pressure gauge to check filter pollution and measure the system water flow rate.
  - Water flow control valve.
- leaf Simplified electrical connections
  - Main disconnect switch with high trip capacity.
  - Transformer to supply the integrated control circuit (400/24V).
- leaf Fast commissioning
  - Systematic factory operation test before shipment.
  - Quick-test function for step-by-step verification of the instruments, expansion devices, fans and compressors.

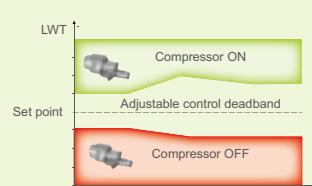

## Absolute reliability

- leaf Screw compressors
  - Industrial-type screw compressors with oversized bearings and motor cooled by suction gas.
  - All compressor components are easily accessible on site minimizing down-time.
  - Electronic motor protection against overloads and power supply faults (loss of phase, phase reversal).
- leaf Evaporator
  - Thermal insulation with aluminium cladding for perfect resistance against outside aggression(mechanical and UV protection).
- leaf Exceptional endurance tests
  - Partnerships with specialised laboratories and use of limit simulation tools (finite element calculation) for the design of critical components.
  - Transport simulation test in the laboratory on a vibrating table. The test is based on a military standard and equivalent to 4000 km by truck.
  - Salt mist corrosion resistance test in the laboratory for increased corrosion resistance.

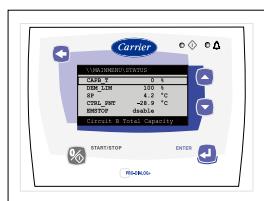

Cooler aluminium protective cladding

## Pro-Dialog Plus Control

Pro-Dialog Plus combines advanced control logic with simple operation. The control system monitors all operation parameters all the time and precisely manages the operation of compressors, electronic expansion devices, fans for optimized energy efficiency.

Pro-Dialog Plus interface

Pro-Dialog Plus with touch screen (option)

### User-friendly interface

- The new backlit LCD interface includes a manual control potentiometer to ensure legibility under any lighting conditions. The information is in clear text and can be displayed in English.
- Unit uses intuitive tree-structure menus, similar to the internet navigators. They are user-friendly and permit quick access to the principal operating parameters: number of compressors operating, suction/discharge pressure, compressor operating hours, set point, air temperature, entering/leaving water temperature.
- Large touch screen user interface (option) offers intuitive access to the operating parameters. The information is in clear text and can be displayed in English.

### Advanced control function

- Unit provides different control mode including LOCAL/REMOTE/CCN.
- Remote control function including: Unit ON/OFF, dual set point control, 2-level demand limit control, user safety interlock, water pump operation control, operation indication, circuit alarm and alert etc.
- Automatic reset of leaving water temperature based on return water temperature or outside air temperature to ensure optimized energy efficiency.
- Control algorithm prevents excessive compressor cycling and permits reduction of the water quantity in the hydronic circuit (Carrier patent).
- Automatic compressor unloading in case of abnormally high condensing pressure. If an abnormal incident occurs (e.g. fouled condenser coil, fan failure), Aquaforce continues to operate, but at reduced capacity.
- Patented defrost control algorithm reduced the defrost cycle duration by an average level of 50%(30XQ).

### Powerful Diagnostics

- A quick test of all unit components and control points to verify the correct operation of every switch, circuit breaker, contactor etc. at the start of the chiller.
- Real-time monitor all the operation parameter, and alarm when necessary.
- Control system is facilitated with RS485 serial communication port for remote diagnosis or special diagnosis tools.

### Sufficient safety measures

- Password protection in case of mishandling.
- Unit is protected against: Loss of refrigerant charge, reverse rotation, low chilled water temperature, low oil pressure (per compressor), current imbalance, compressor thermal overload, excessive air temperature, high pressure, electrical overload, loss of phase.

### Group control

- Master/slave control of two chillers connected to automatically balance operating times, and also automatically conduct change-over in case of a unit fault.
- Communication with other Building Management System (BMS) by selecting BacNet/J-Bus/LonTalk gateway.

# Operating Range, 30XA

## Cooling mode

Evaporator	Min.temperature	Max.temperature
Entering water temperature (at start)	-	45°C
Entering water temperature (during operation)	6.8°C	21°C
Leaving water temperature (during operation)	3.3°C	15°C
Condenser	Min.temperature	Max.temperature
Outdoor air temperature	-10°C	50** (for 30XA0252~1502)****
		46*** (for 30XA0652~1392)****

\* With PT028 "winter operation", outdoor air temperature may down to -20°C. A glycol/water solution or evaporator anti-freeze protection must be used if the air temperature is below 0°C

\*\* Max 55°C during part load operation.

\*\*\* Max 50°C during part load operation

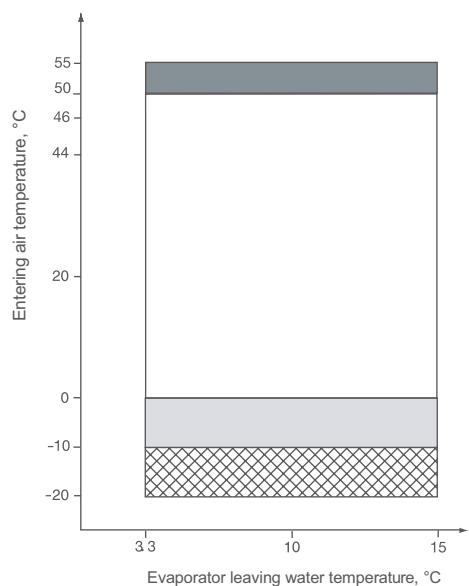

\*\*\*\*30XA0252~1502 - 30XA0252/0302/0352/0402/0452/0502/0602/0702/0752/0852/0902/1002/1352/1502

\* Nominal cooling mode - evaporator entering/leaving water temperature 12/7°C, outside air temperature 35°C

Nominal heating mode - water heat exchanger entering/leaving water temperature 40/45°C, outside air temperature 7°C

Water heat exchanger fouling factor 0.018m<sup>2</sup>K/kW

\*\* For duplex models (0860-1500) the listed on the left side and right side of "/" refer to module B (circuit C+D) and module A (circuit A+B) respectively

## Options & accessories

Options	No.	Description	Advantages	Use*
Blygold PoluAL	002B	Coil with factory-applied Blygold PoluAL treatment	Improved corrosion resistance, recommended for heavy marine and industrial environments	30XA0282~0482 30XA0252~1502 30XA0652~1392
Gold Fin	003A	Fin made of pre-treated aluminium (polyurethane and epoxy)	Improved corrosion resistance, recommended for light marine environments	30XA0282~0482 30XA0252~1502 30XA0652~1392
Medium brine	005	Leaving water temperature down to -6 °C	For low temperature applications such as ice storage, cold stores or process cooling etc.	30XA0252~1502
High static fan	012	High static pressure fan for indoor unit installation with discharge ducts	Ducted condenser air discharge, optimized condensing temperature control	30XA0252~1502
Low noise	015	Compressor sound enclosure	Low operating noise	30XA0282~0482 30XA0252~1502 30XA0652~1392
Low noise	015L	Low-speed fan	Low operating noise	30XA0282~0482 30XA0252~1502 30XA0652~1392
Super low noise	015LS	Compressor sound enclosure and low-speed fan	Super low operating noise	30XA0282~0482 30XA0252~1502 30XA0652~1392
Low noise	015S	Compressor and oil separator sound jacket	Low operating noise	30XQ0330~1500
MCHX bare coil	018	Micro-channel heat exchanger	30% reduction of refrigerant charge amount and convenient to clean by a high pressure washer	30XA0282~0482 30XA0252~1502
IP54	020A	IP 54 electrical box protection	Improved electrical box protection, recommended for dusty / sandy environments	30XA0282~0482 30XA0252~1502 30XA0652~1392
Soft starter	025	Electronic starter on each compressor	Reduced start-up current	30XA0602~1502
Winter operation	028	Fan speed control by frequency inverter	Stable operation between -10°C to -20°C outdoor air temperature	30XA0252~1502
Evaporator anti-freeze protection	041A	Electric heater on evaporator	Ensures evaporator anti-freeze protection down to -20°C without glycol	30XA0282~0482 30XA0252~1502
Evaporator and hydronic module anti-freeze protection	041B	Electric heater on evaporator and hydronic module	Ensures evaporator & hydronic module anti-freeze protection down to -20°C without glycol	30XA0282~0482 30XA0252~0502
Full heat recovery	050	Heat recovery water cooled condenser	Recover 100% of rejected heat	30XA0252~1002
Single point power connection	081	Single main power connection	Easy to power connection	30XA1352/1502

\* 30XA0282~0482 - 30XA0282/0342/0442/0482

30XA0252~0502 - 30XA0252/0302/0352/0402/0452/0502

30XQ0330~1500 - 30XQ0330/0430/0500/0660/0750/0860/0930/1000/1090/1160/1250/1320/1410/1500

## Options & accessories

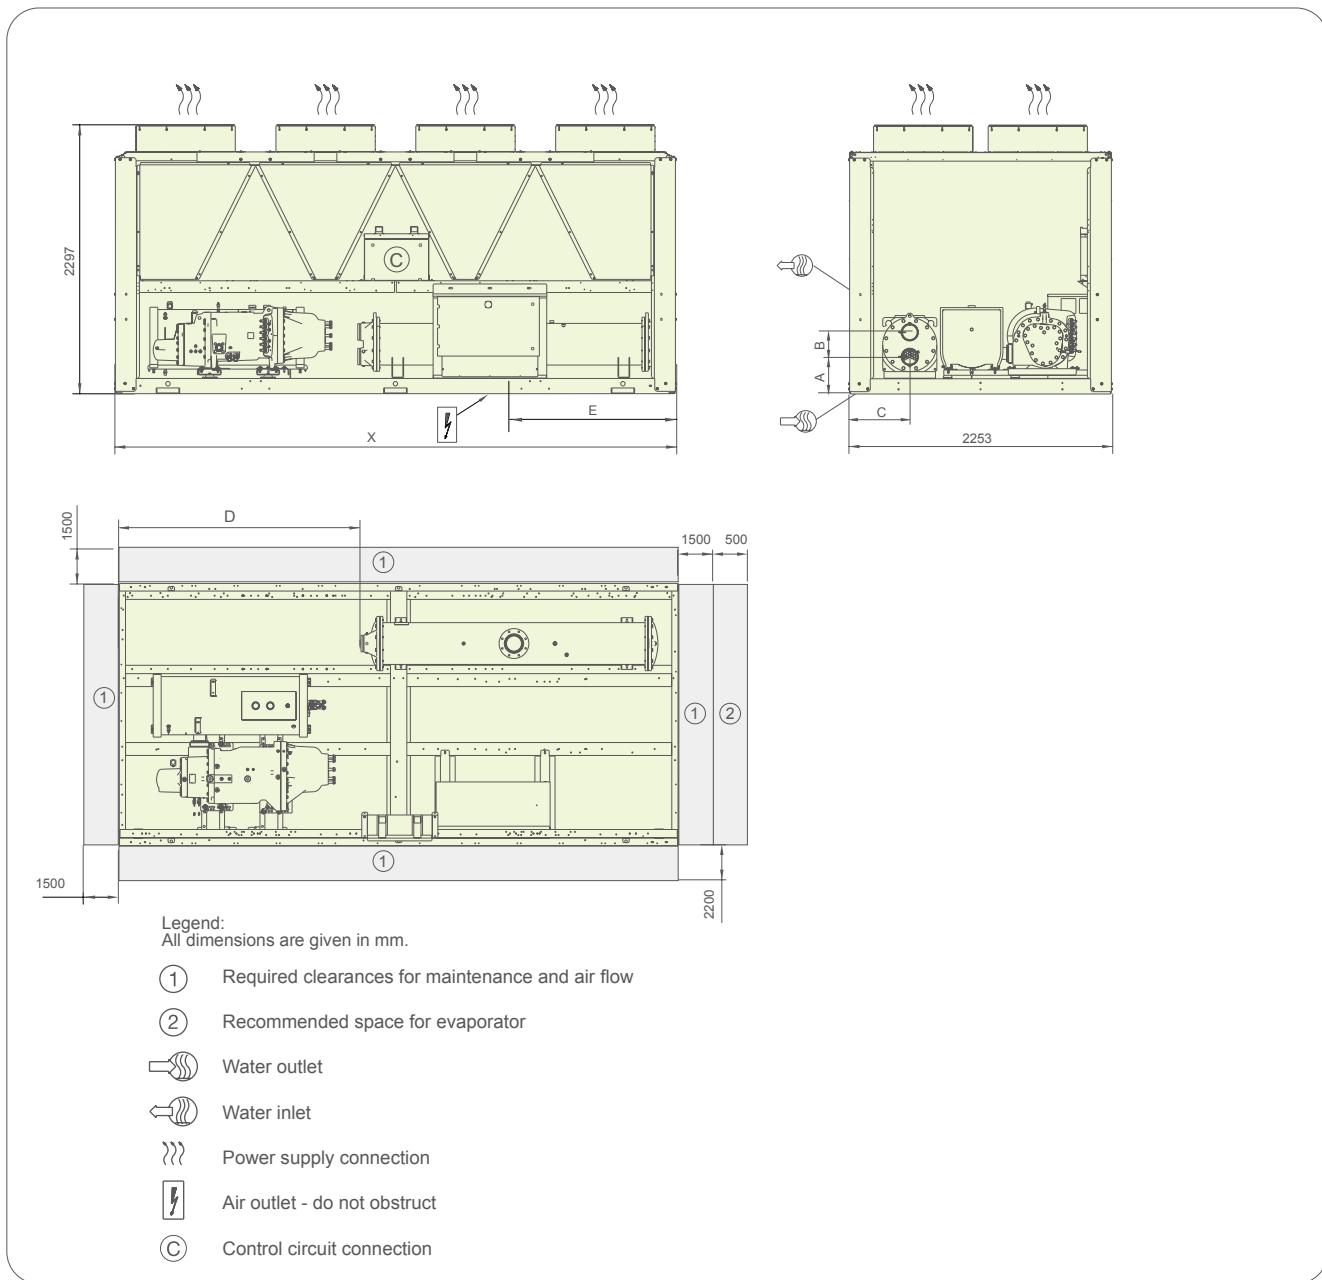

Options	No.	Description	Advantages	Use*
1600kPa evaporator	104	Reinforced evaporator for extension of the maximum water-side pressure range to 1600kPa	Covers applications with a high water column (high buildings)	30XA0282~0482 30XA0252~1502
Reversed water connections	107	Evaporator with reversed water inlet/outlet	Simplification of water piping	30XA0282~0482 30XA0602~1502 30XA0712/0762
Fixed speed single pump hydronic module	116B	Provide fixed speed single pump of average 200KPa external pressure	Easy and fast installation	30XA0282~0482 30XA0252~0502
Fixed speed dual pump hydronic module	116C	Provide fixed speed dual pumps of average 200KPa external pressure	Easy and fast installation, operating safety	30XA0282~0482 30XA0252~0502
Direct-expansion free-cooling system	118A	Chilled water production without the use of the compressors, using direct-expansion heat exchange on the condensers	Very economical chilled water production at low outdoor temperatures	30XA0252-1002**
J-Bus gateway	148B	Two-directional communication board with J-Bus protocol	Easy connection by communication bus to a building management system	30XA0282~0482 30XA0252~1502 30XA0652~1392 30XQ0330~1500
BacNet gateway	148C	Two-directional communication board with BacNet protocol	Easy connection by communication bus to a building management system	30XA0282~0482 30XA0252~1502 30XA0652~1392 30XQ0330~1500
LonTalk gateway	148D	Two-directional communication board with LonTalk protocol	Easy connection by communication bus to a building management system	30XA0282~0482 30XA0252~1502 30XA0652~1392 30XQ0330~1500
Energy Management Module (EMM)	156	See control manual	-	30XA0282~0482 30XA0252~1502 30XA0652~1392 30XQ0330~1500
Touch screen display	158	Pro-Dialog control with touch screen interface	User friendly	30XA0282~0482 30XA0252~1502 30XA0652~1392 30XQ0330~1500
Cu/Al condenser coils	254	Coil made of copper tube with aluminium fin	-	30XA0282~0482 30XA0252~1502 30XA0652~1392
Super Enviro-shield MCHX coils	263	E-coated MCHX coils	Improved corrosion resistance, recommended for heavy marine and industrial environments	30XA0282~0482 30XA0252~1502
38mm cooler insulation	299	38mm thermal insulation on cooler	Better prevents condensation on high humidity environment	30XA0252-1502
Lead Lag Control	301	To allow master/slave operation of two chillers connected in parallel or series	Optimised operation of two chillers connected in parallel with operating time balancing	30XA0252-1502
Blue fin	303	Hydrophilic aluminium foil	Enhanced hydrophilic character and better aesthetics	30XA0282~0482 30XA0252~1502
Conformance with Australian regulations	312AN	Evaporator and oil separator modified according to Australian regulations	-	30XA0282~0482 30XA0252~1502

\* 30XA0282~0482 - 30XA0282/0342/0442/0482  
 30XA0252~0502 - 30XA0252/0302/0352/0402/0452/0502

0482	346	272	438	2182	1371	4798

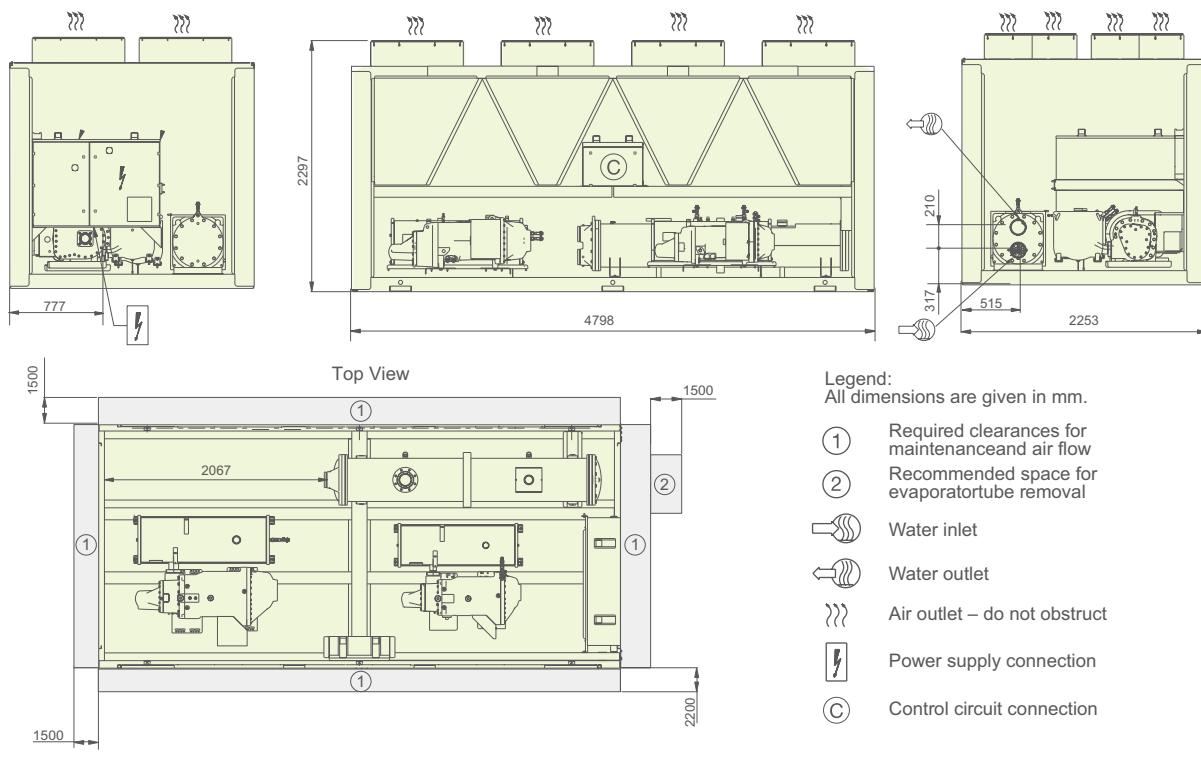

Note: Single point power connection, power cable arrive from bottom of electrical box, reserve at least 120mm height space below unit for power supply connection (unit aerial installation or cable slot)

## Dimensions/Clearances

30XA0252/0302 - Cu/Al Condenser coils (option 254)

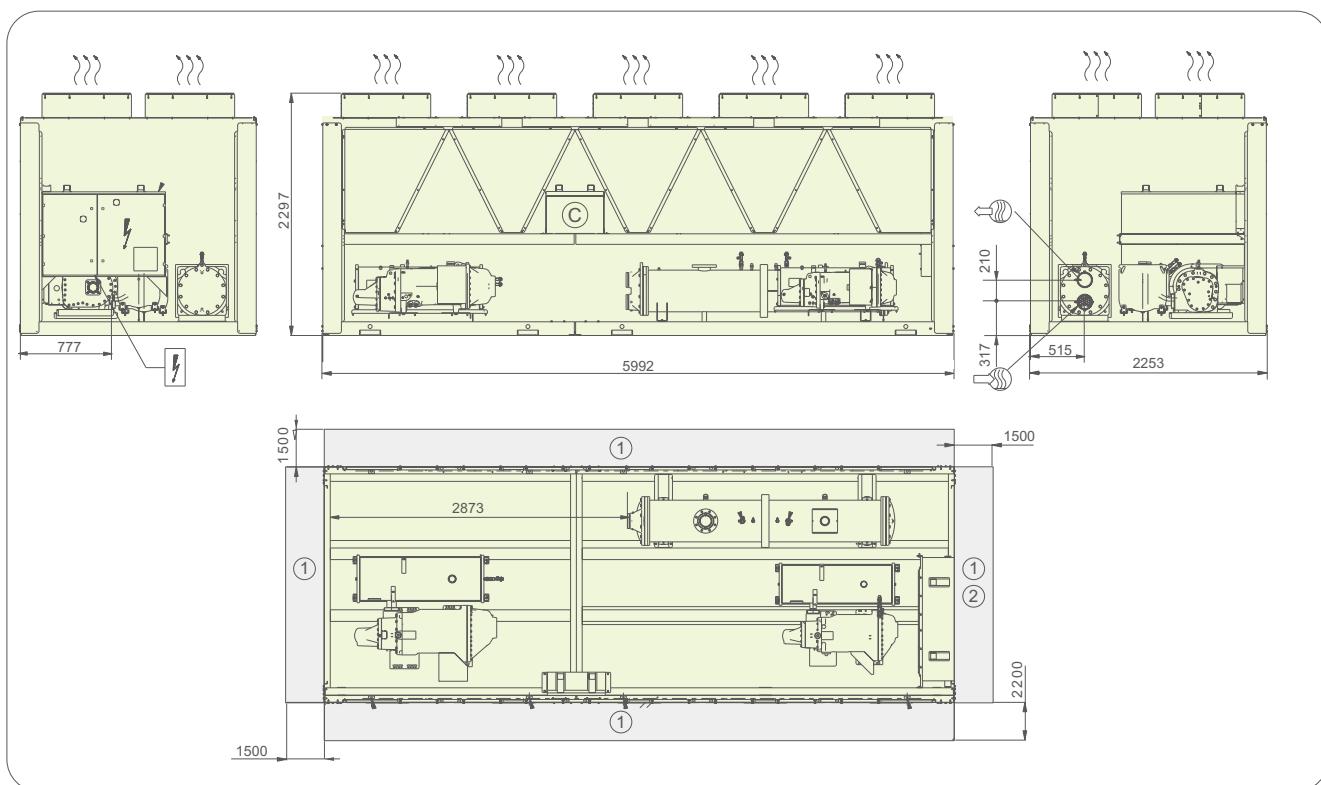

30XA0352/0402/0452 - Cu/Al Condenser coils (option 254)

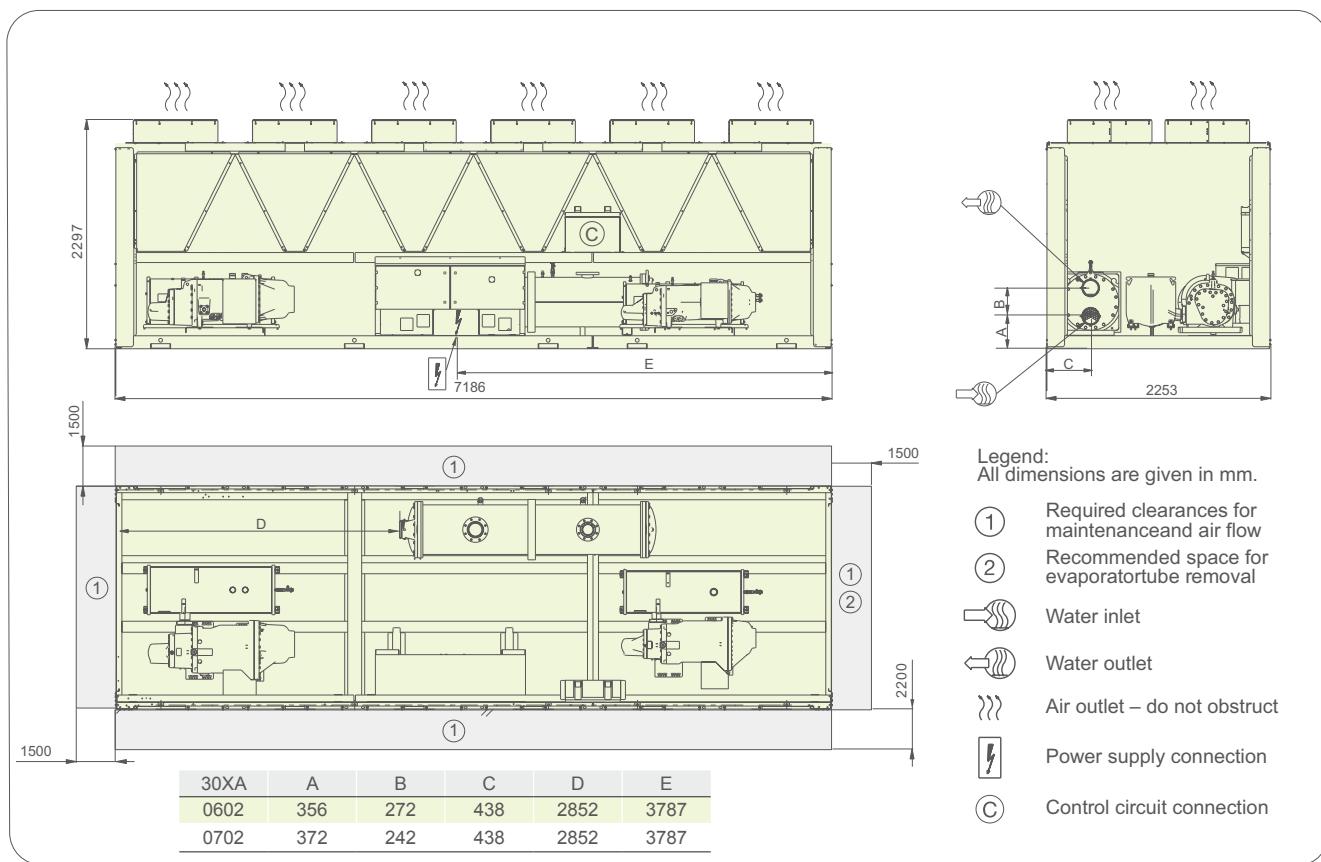

Note: Single point power connection, power cable arrive from bottom of electrical box

## Dimensions/Clearances

30XA0502 - Cu/Al Condenser coils (option 254)

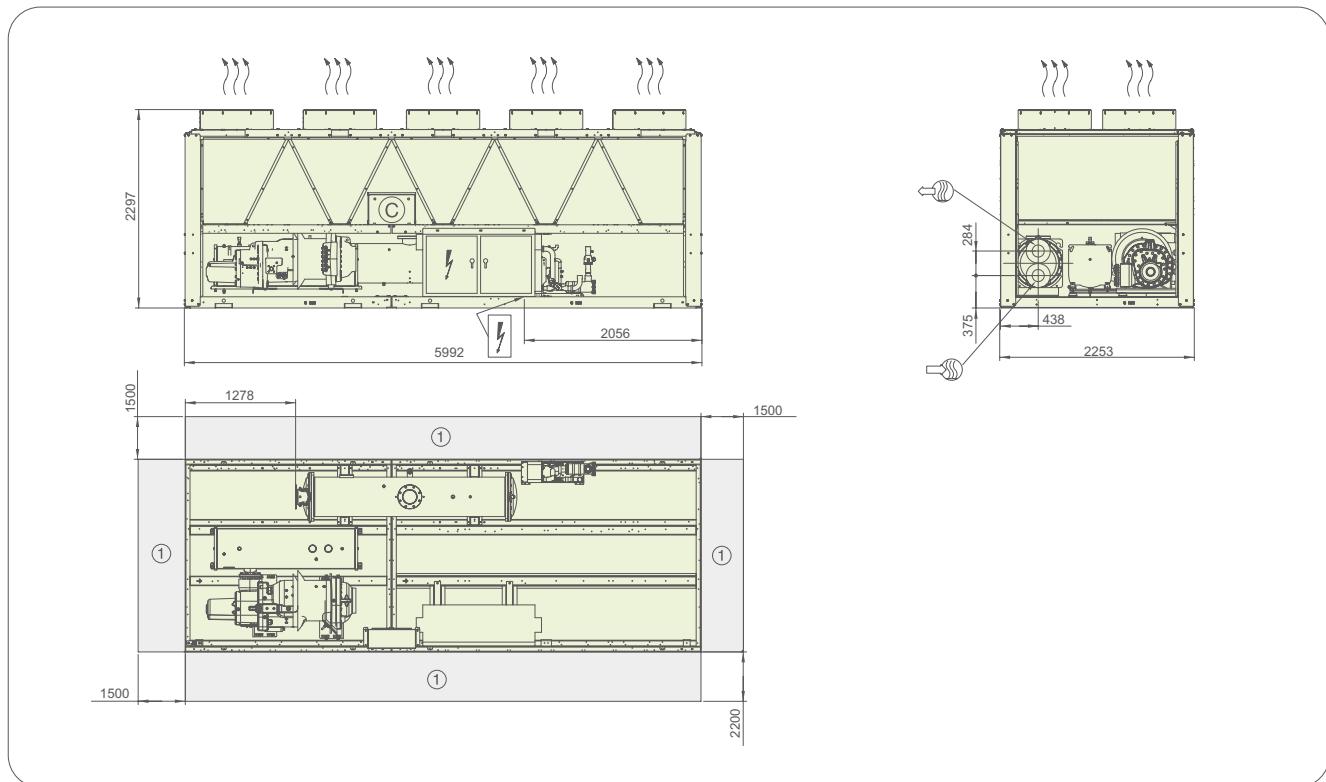

30XA 0602/0702 - Cu/Al Condenser coils (option 254)

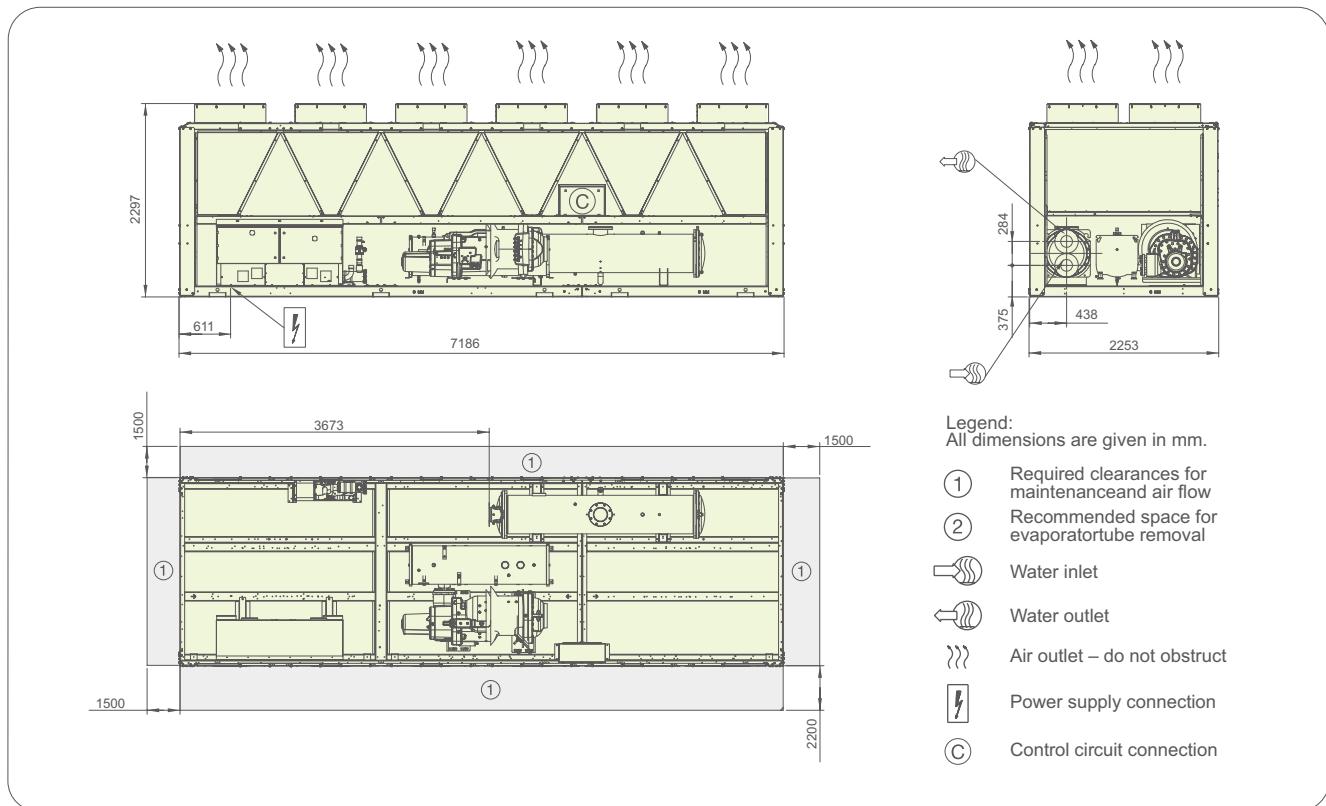

Note: Single point power connection, power cable arrive from bottom of electrical box, reserve at least 120mm height space below unit for 30XA0602~0702 power supply connection (unit aerial installation or cable slot)

## Dimensions/Clearances

30XA0652 - Cu/Al Condenser coils (option 254)

30XA0712/0762 - Cu/Al Condenser coils (option 254)

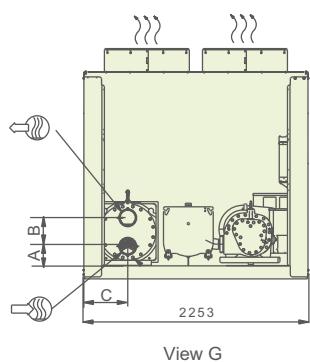

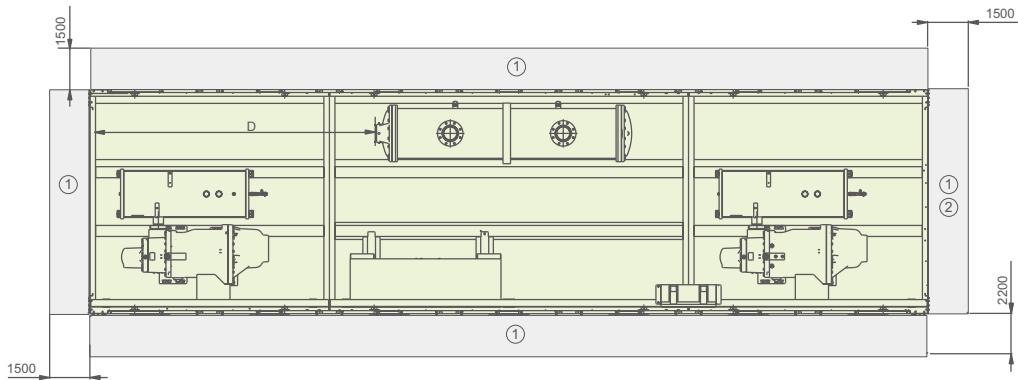

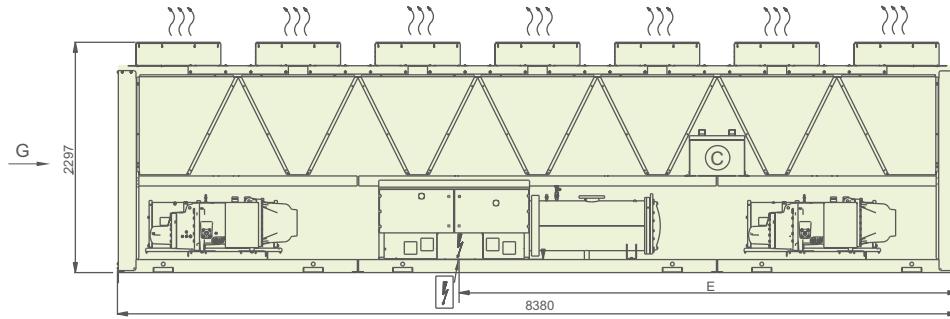

**Legend:**  
All dimensions are given in mm.

- ① Required clearances for maintenance and air flow
- ② Recommended space for evaporator tube removal
- Water inlet
- Water outlet
- Air outlet – do not obstruct
- Power supply connection
- Control circuit connection

Note: Single point power connection, power cable arrive from bottom of electrical box, reserve at least 120mm height space below unit for 30XA0652~0762 power supply connection (unit aerial installation or cable slot)

## Dimensions/Clearances

30XA0752/0852 - Cu/Al Condenser coils (option 254)

**Legend:**  
All dimensions are given in mm.

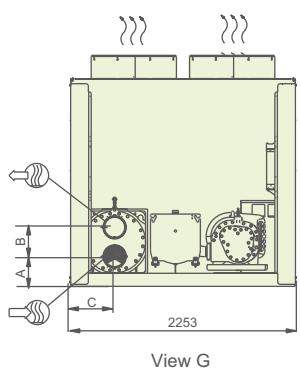

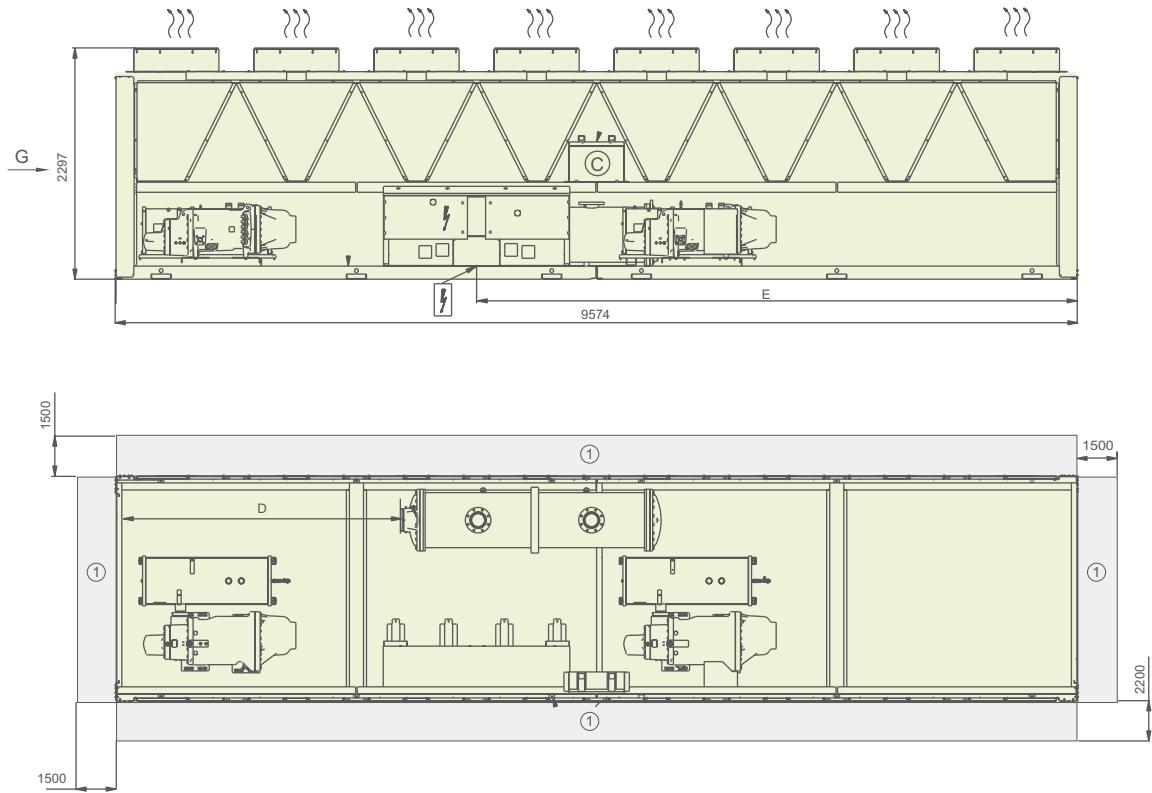

- (1) Required clearances for maintenance and air flow
- (2) Recommended space for evaporator tube removal
- Water inlet
- Water outlet
- Air outlet – do not obstruct
- Power supply connection
- Control circuit connection

0852	325	284	438	2836	4965

Note: Single point power connection, power cable arrive from bottom of electrical box, reserve at least 120mm height space below unit for power supply connection (unit aerial installation or cable slot)

## Dimensions/Clearances

30XA0902/1002 - Cu/Al Condenser coils (option 254)

Legend:  
All dimensions are given in mm.

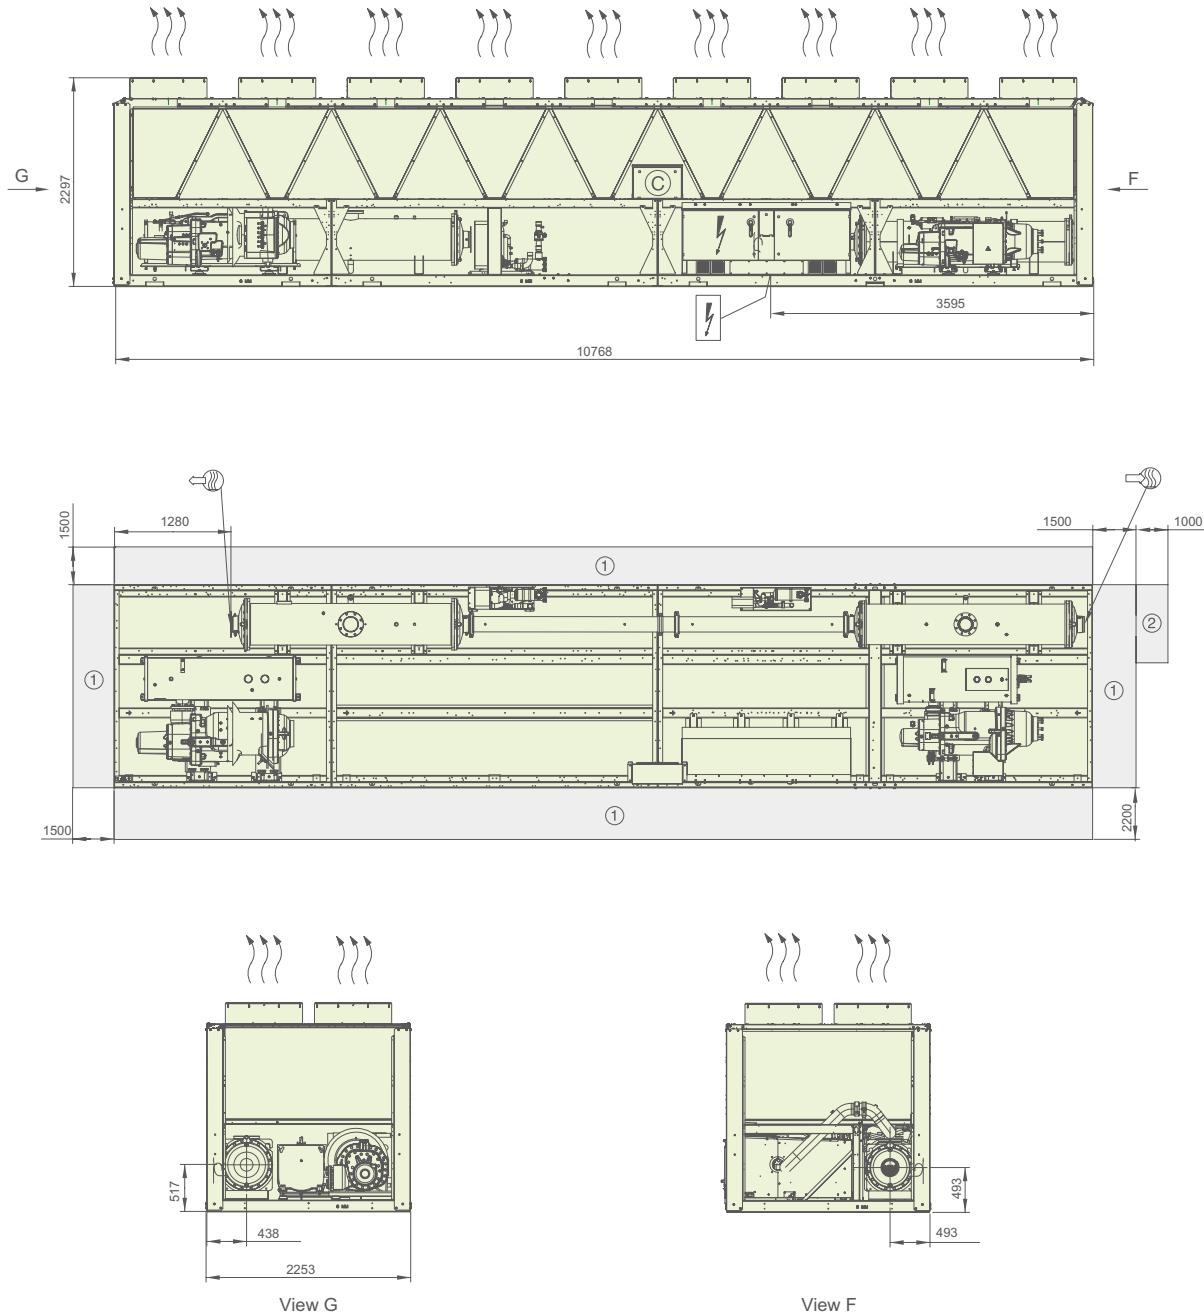

- (1) Required clearances for maintenance and air flow
- (2) Recommended space for evaporator tube removal
- Water inlet
- Water outlet
- Air outlet – do not obstruct
- Power supply connection
- Control circuit connection

30XA	A	B	C	D	E
0902	325	284	438	2840	5924
1002	297	438	438	2832	5924

Note: Single point power connection, power cable arrive from bottom of electrical box, reserve at least 120mm height space below unit for power supply connection (unit aerial installation or cable slot)

## Dimensions/Clearances

30XA1052/1152 - Cu/Al Condenser coils (option 254)

### Legend:

All dimensions are given in mm.

- (1) Required clearances for maintenance and air flow
- (2) Recommended space for evaporator tube removal

- Water inlet
- Water outlet

Air outlet – do not obstruct

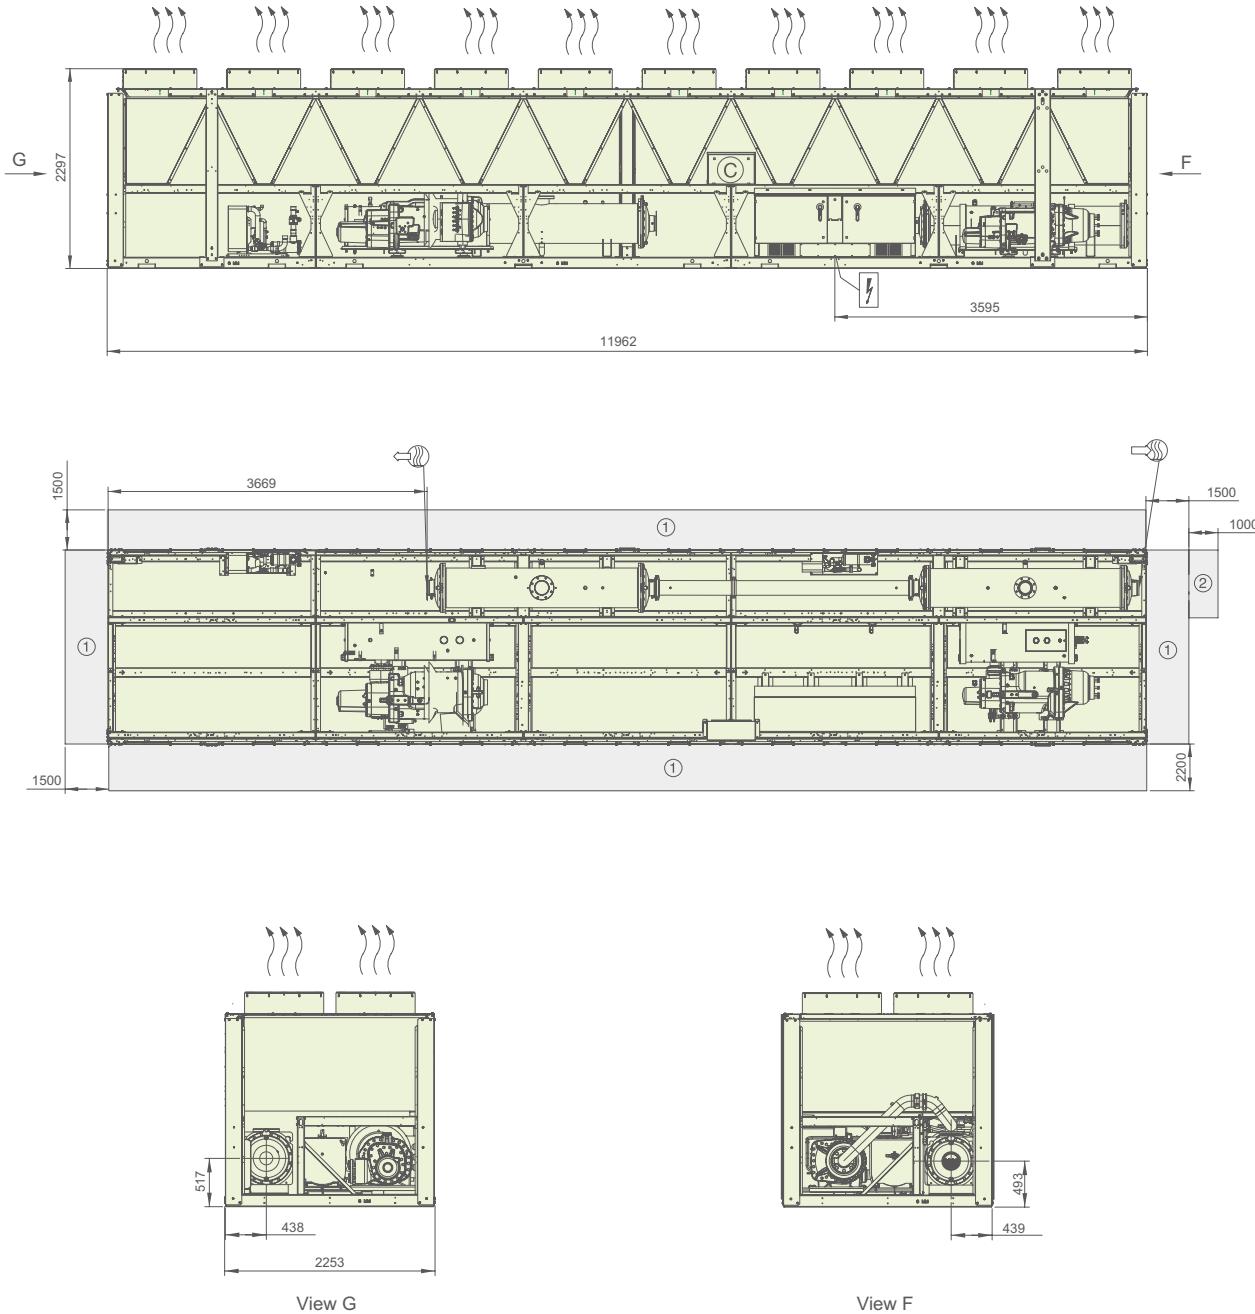

Power supply connection

Control circuit connection

Note: Single point power connection, power cable arrive from bottom of electrical box, reserve at least 120mm height space below unit for 30XA1052/1152 power supply connection (unit aerial installation or cable slot)

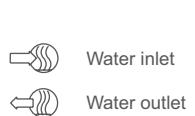

## Dimensions/Clearances

### 30XA1252 - Cu/Al Condenser coils (option 254)

**Legend:**  
All dimensions are given in mm.

- ① Required clearances for maintenance and air flow
- ② Recommended space for evaporator tube removal

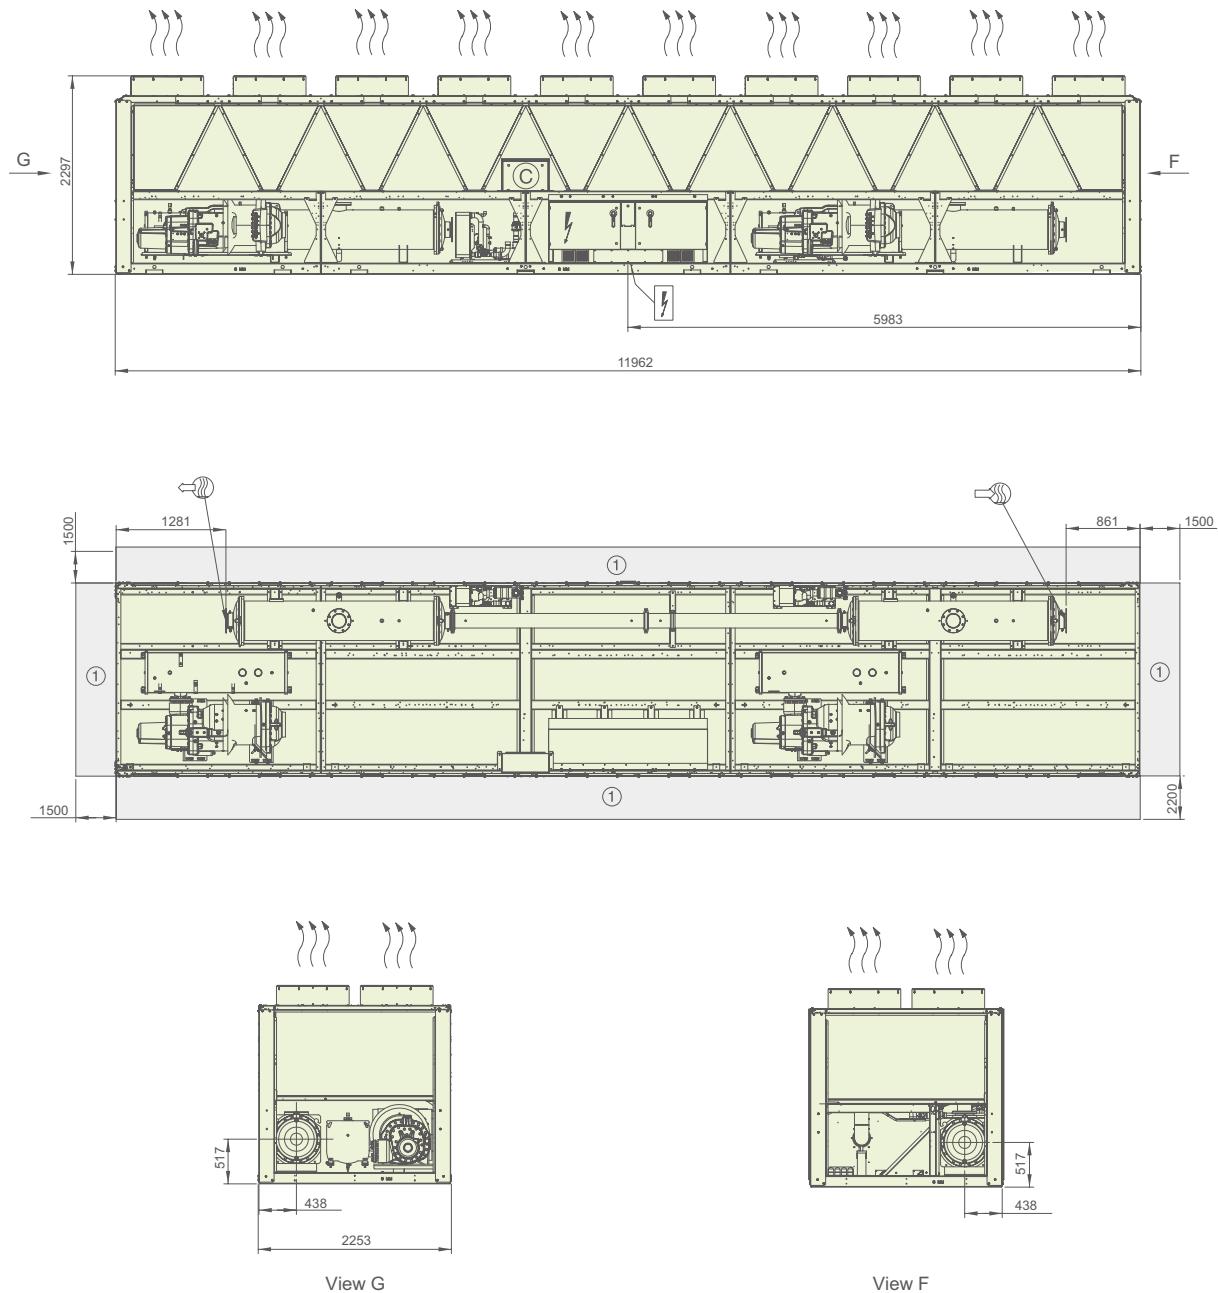

- Air outlet – do not obstruct
- Power supply connection
- Control circuit connection

Note: Single point power connection, power cable arrive from bottom of electrical box, reserve at least 120mm height space below unit for 30XA1052/1152 power supply connection (unit aerial installation or cable slot)

## Dimensions/Clearances

30XA1312/1392 - Cu/Al Condenser coils (option 254)

### Legend:

All dimensions are given in mm.

- (1) Required clearances for maintenance and air flow
- (2) Recommended space for evaporator tube removal

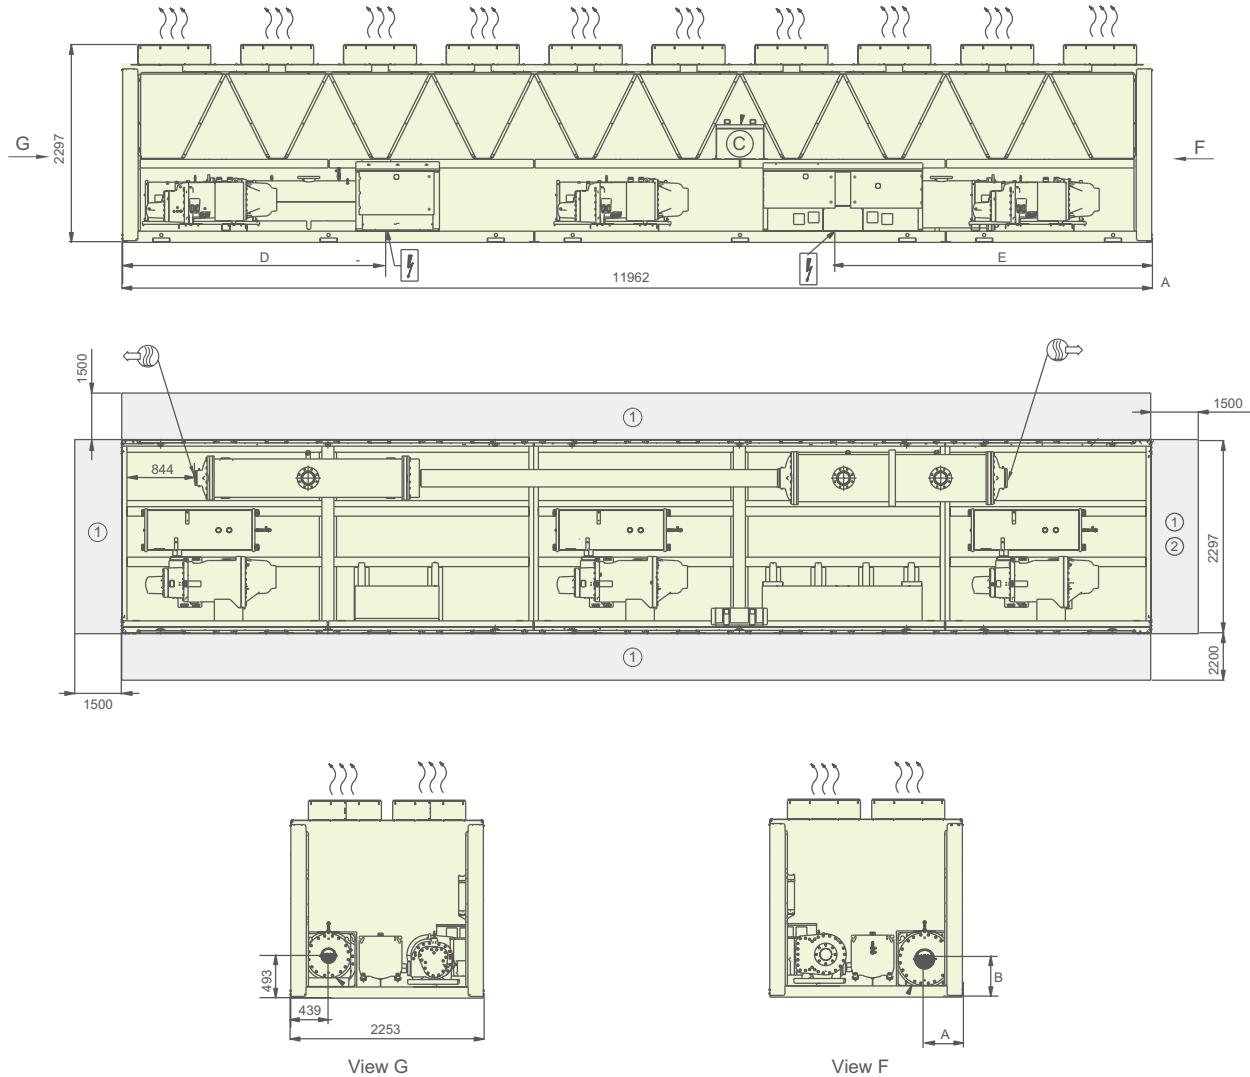

- Water inlet
- Water outlet

- Air outlet – do not obstruct
- Power supply connection
- Control circuit connection

Note: Single point power connection, power cable arrive from bottom of electrical box, reserve at least 120mm height space below unit for 30XA1312/1392 power supply connection (unit aerial installation or cable slot)

## Dimensions/Clearances

30XA1352 - Cu/Al Condenser coils (option 254)

Legend:

All dimensions are given in mm.

- (1) Required clearances for maintenance and air flow
- (2) Recommended space for evaporator tube removal

Air outlet – do not obstruct

Water inlet

Power supply connection

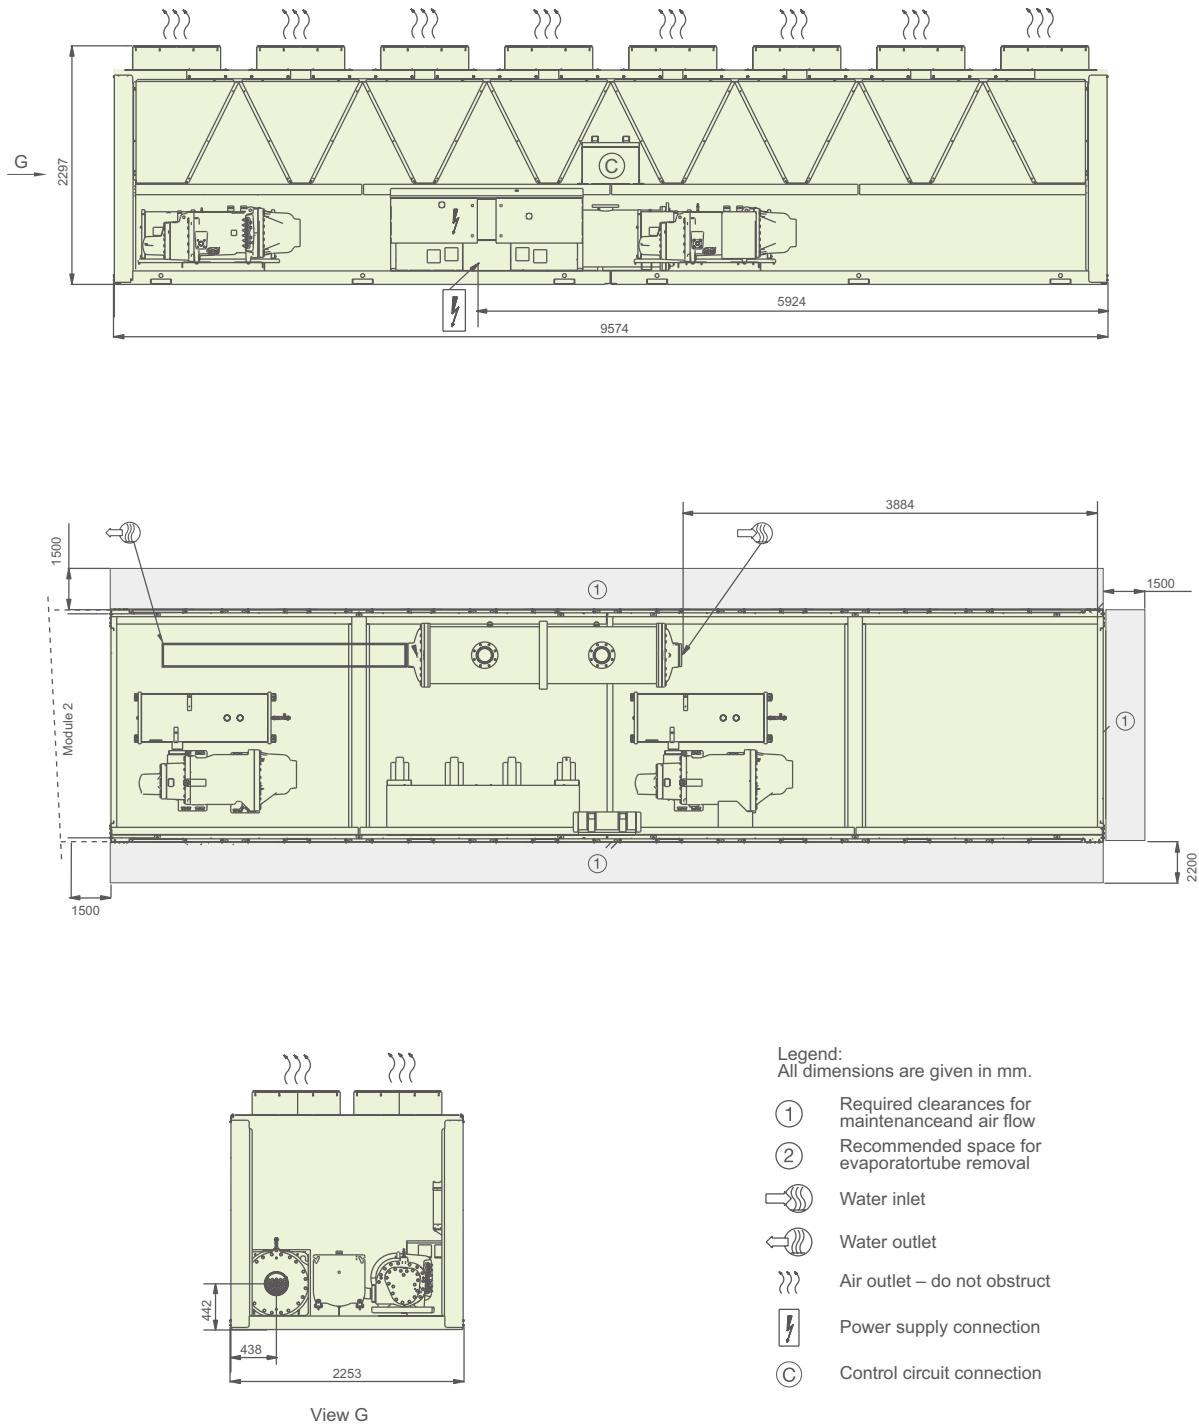

Control circuit connection

30XA	A	B	C	D	E
1352	439	442	1670	3428	3387

Note: Dual point power connection (Single point power connection as option), power cable arrive from bottom of electrical box, reserve at least 120mm height space below unit for power supply connection (unit aerial installation or cable slot)

## Dimensions/Clearances

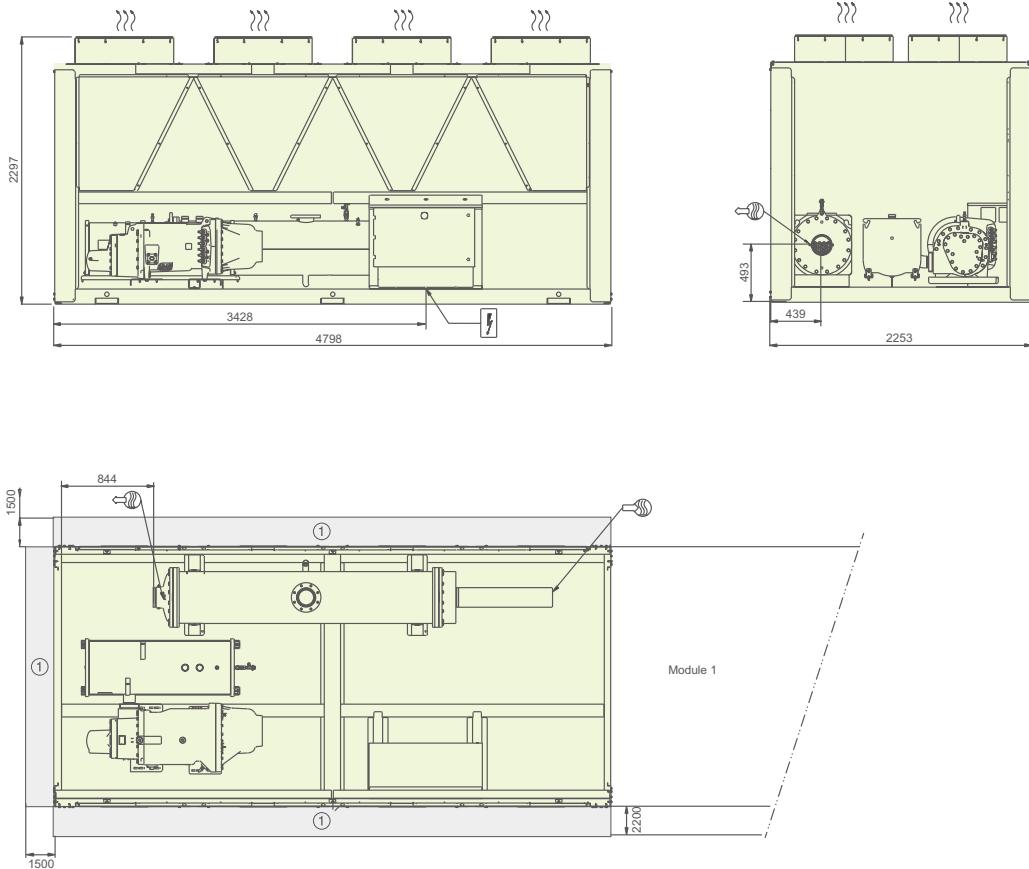

30XA1502, module 1/2 - Cu/Al Condenser coils (option 254)

Note: Dual point power connection (Single point power connection as option), power cable arrive from bottom of electrical box, reserve at least 120mm height space below unit for power supply connection (unit aerial installation or cable slot)

## Dimensions/Clearances

30XA1502, module 2/2 - Cu/Al Condenser coils (option 254)

**Legend:**

All dimensions are given in mm.

- (1) Required clearances for maintenance and air flow
- (2) Recommended space for evaporator tube removal

- Water inlet
- Water outlet

Air outlet – do not obstruct

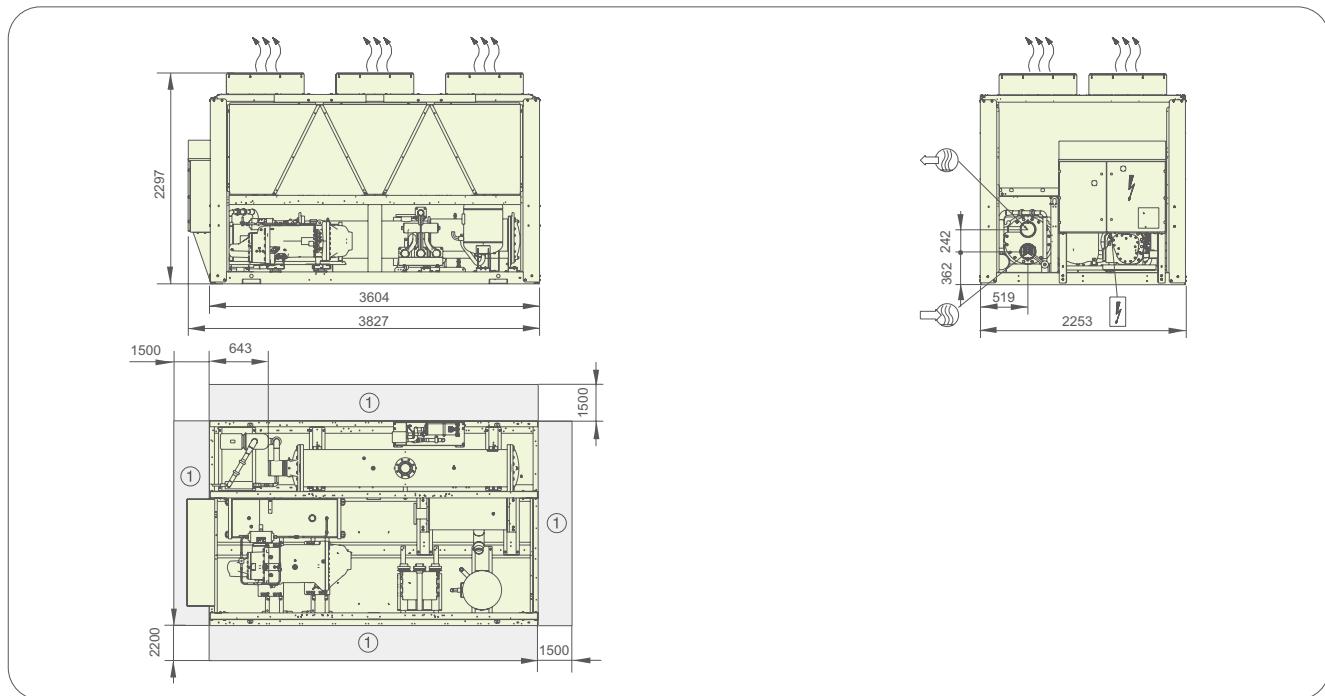

Power supply connection

Control circuit connection

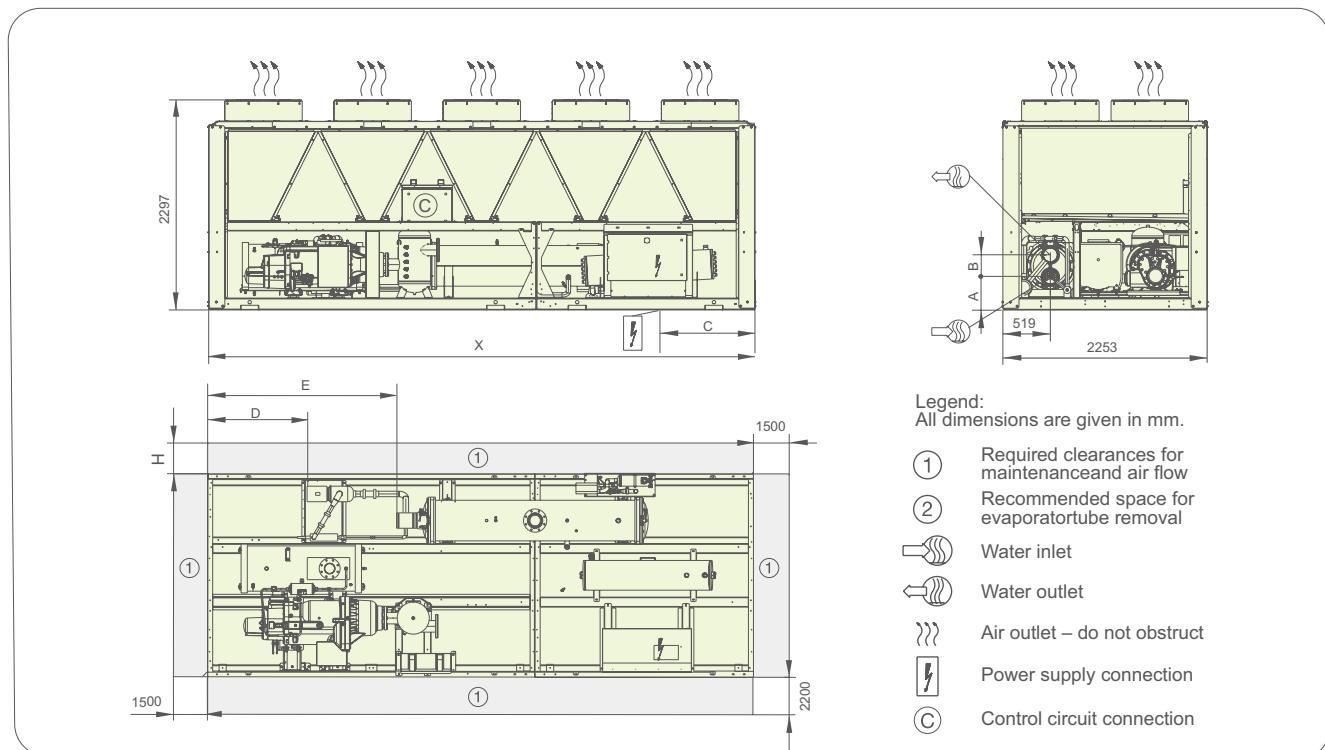

Note: Dual point power connection (Single point power connection as option), power cable arrive from bottom of electrical box, reserve at least 120mm height space below unit for power supply connection (unit aerial installation or cable slot)

## Dimensions/Clearances

30XQ0300 - Cu/Al Condenser coils

30XQ0430/0500 - Cu/Al Condenser coils

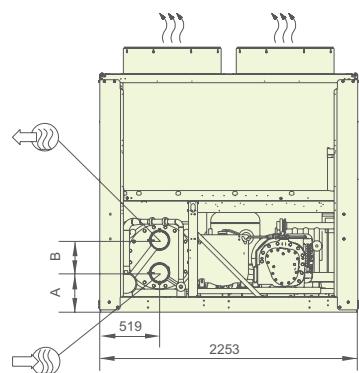

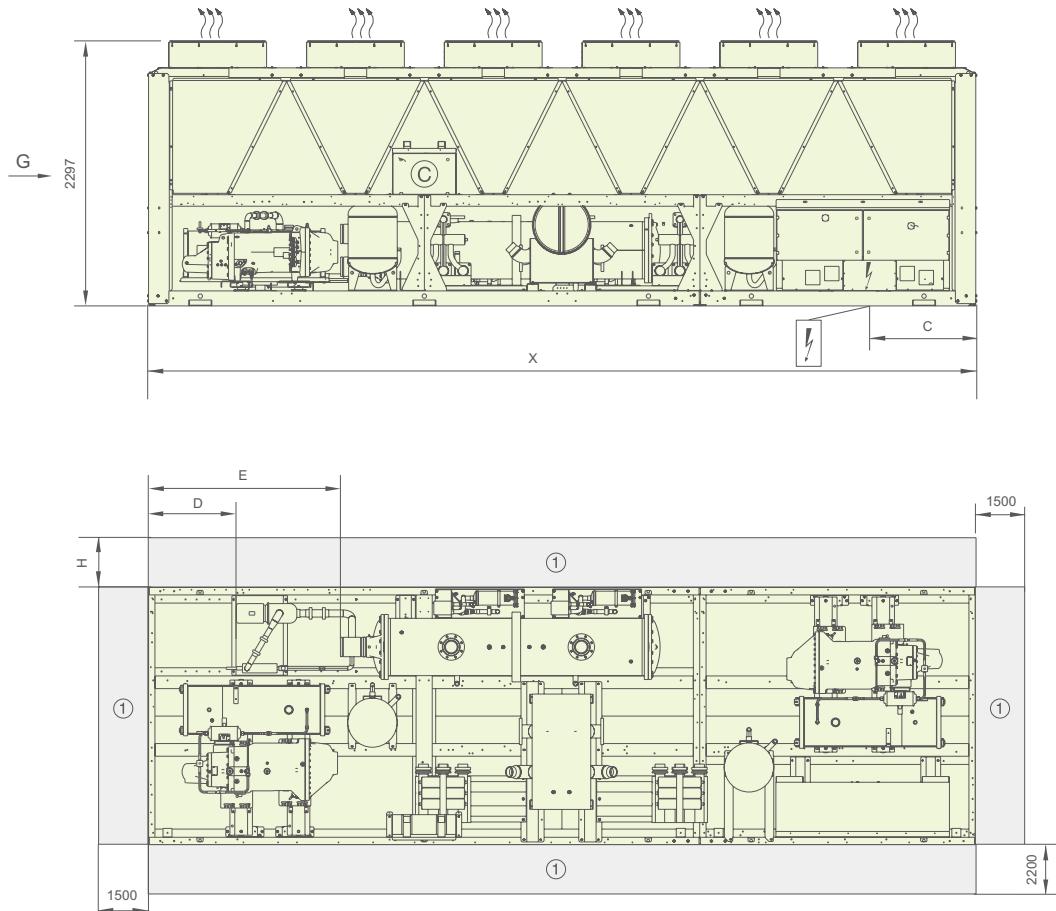

30XQ	A	B	C	D	E	H	X
0430	362	242	457	856	1854	1500	4798
0500	362	242	950	856	1854	1500	5992

Note: Single point power connection, power cable arrive from bottom of electrical box, reserve at least 120mm height space below unit for 30XQ0430~0500 power supply connection (unit aerial installation or cable slot)

## Dimensions/Clearances

### 30XQ0660/0750 - Cu/Al Condenser coils

## Hydronic Connections, 30XA

### Legend:

#### Components of the unit and hydronic module

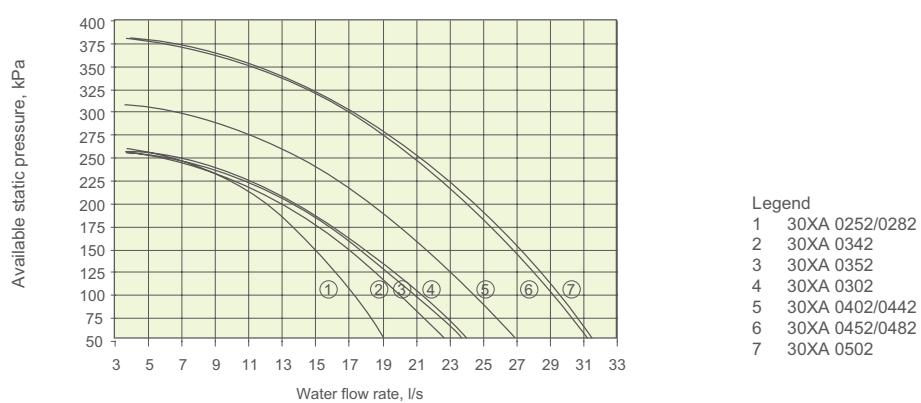

- 1 Victaulic screen filter
- 2 Expansion tank
- 3 Safety valve
- 4 Water pump
- 5 Pressure tap valve (see Installation Manual)
- 6 Pressure gauge to measure the component pressure loss (see Installation Manual)
- 7 System vent valve
- 8 Drain valve
- 9 Water flow control valve
- 10 Evaporator
- 11 Evaporator anti-freeze heater (option)
- 12 Hydronic module anti-freeze heater (option)
- 13 Air vent (evaporator)
- 14 Water purge (evaporator)
- 15 Expansion compensator (flexible connections)
- 16 Flow switch
- 17 Water temperature sensor

#### System components

- 18 Air vent
- 19 Flexible connection
- 20 Shut-down valves
- 21 Charge valve
- Hydronic module (option)

## Available Static System Pressure

High-pressure pumps

## Minimum Water Loop Volume

For better control of leaving water temperature, the water loop minimum capacity is given by the formula:

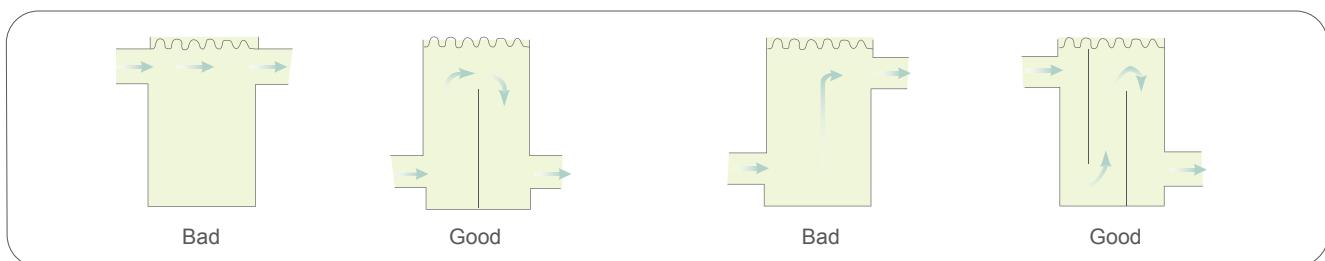

$$\text{Capacity} = \text{CAP (kW)} \times N \text{ Liters}$$

Application	N
Normal air conditioning	3.5
30XA0282-0482/30XA0252-1502/30XA0652-1392 30XQ0330-1500	3.5
Process cooling	6.5
30XA0282-0482/30XA0252-1502/30XA0652-1392 30XQ0330-1500	6.5

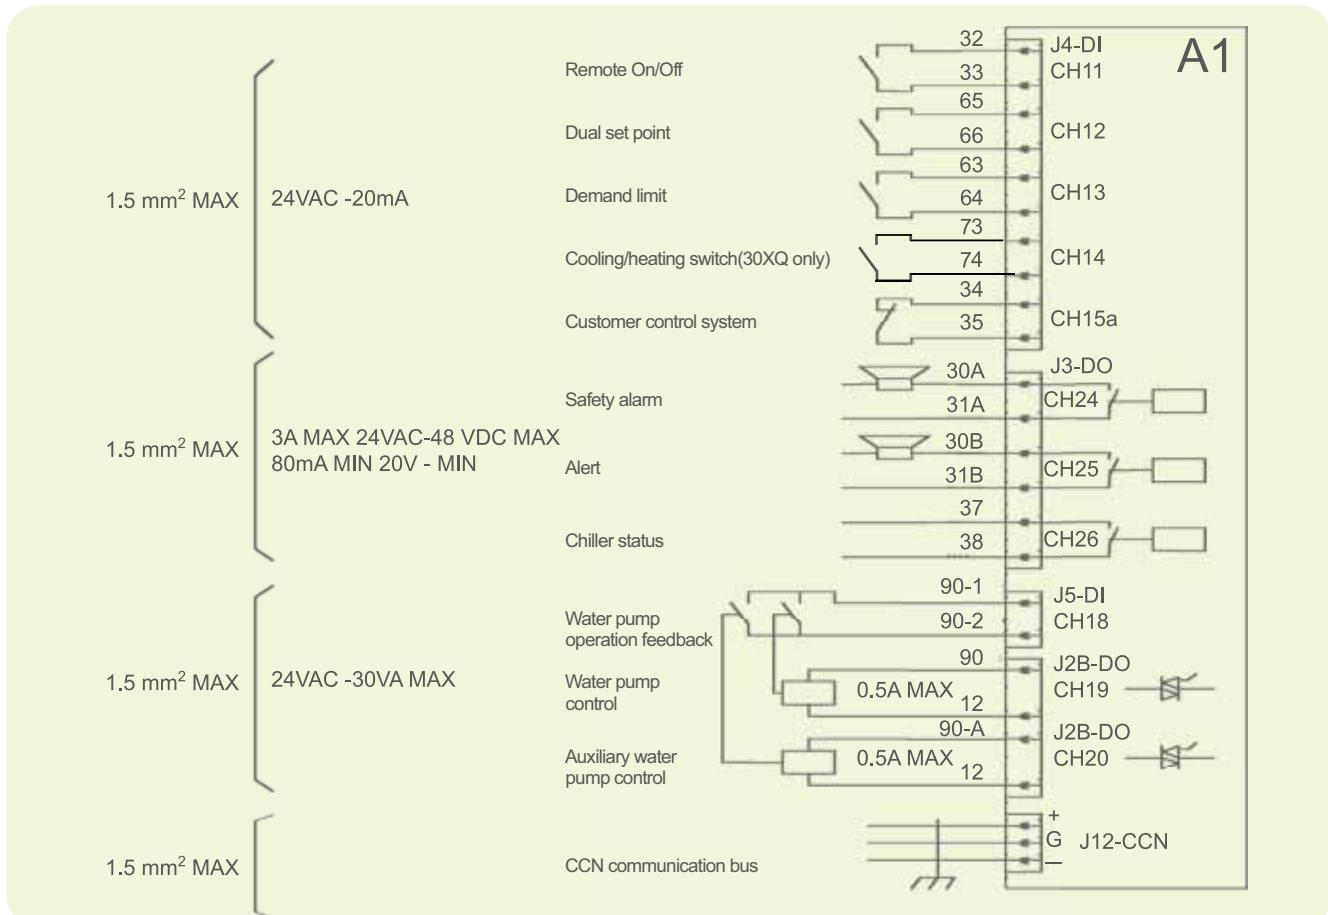

Where Cap is the nominal system cooling capacity (kW) at the nominal operating conditions of the installation.

This volume is necessary for stable operation and accurate temperature control.

It is often necessary to add a buffer water tank to the circuit in order to achieve the required volume. The tank must be internally baffled in order to ensure proper mixing of the liquid (water or brine). Refer to the examples below.

## Field Control Wiring, 30XA/30XQ

Carrier improves the world around us; Carrier improves people's lives; our products and services improve building performance; our culture of improvement will not allow us to rest when it comes to the environment.
